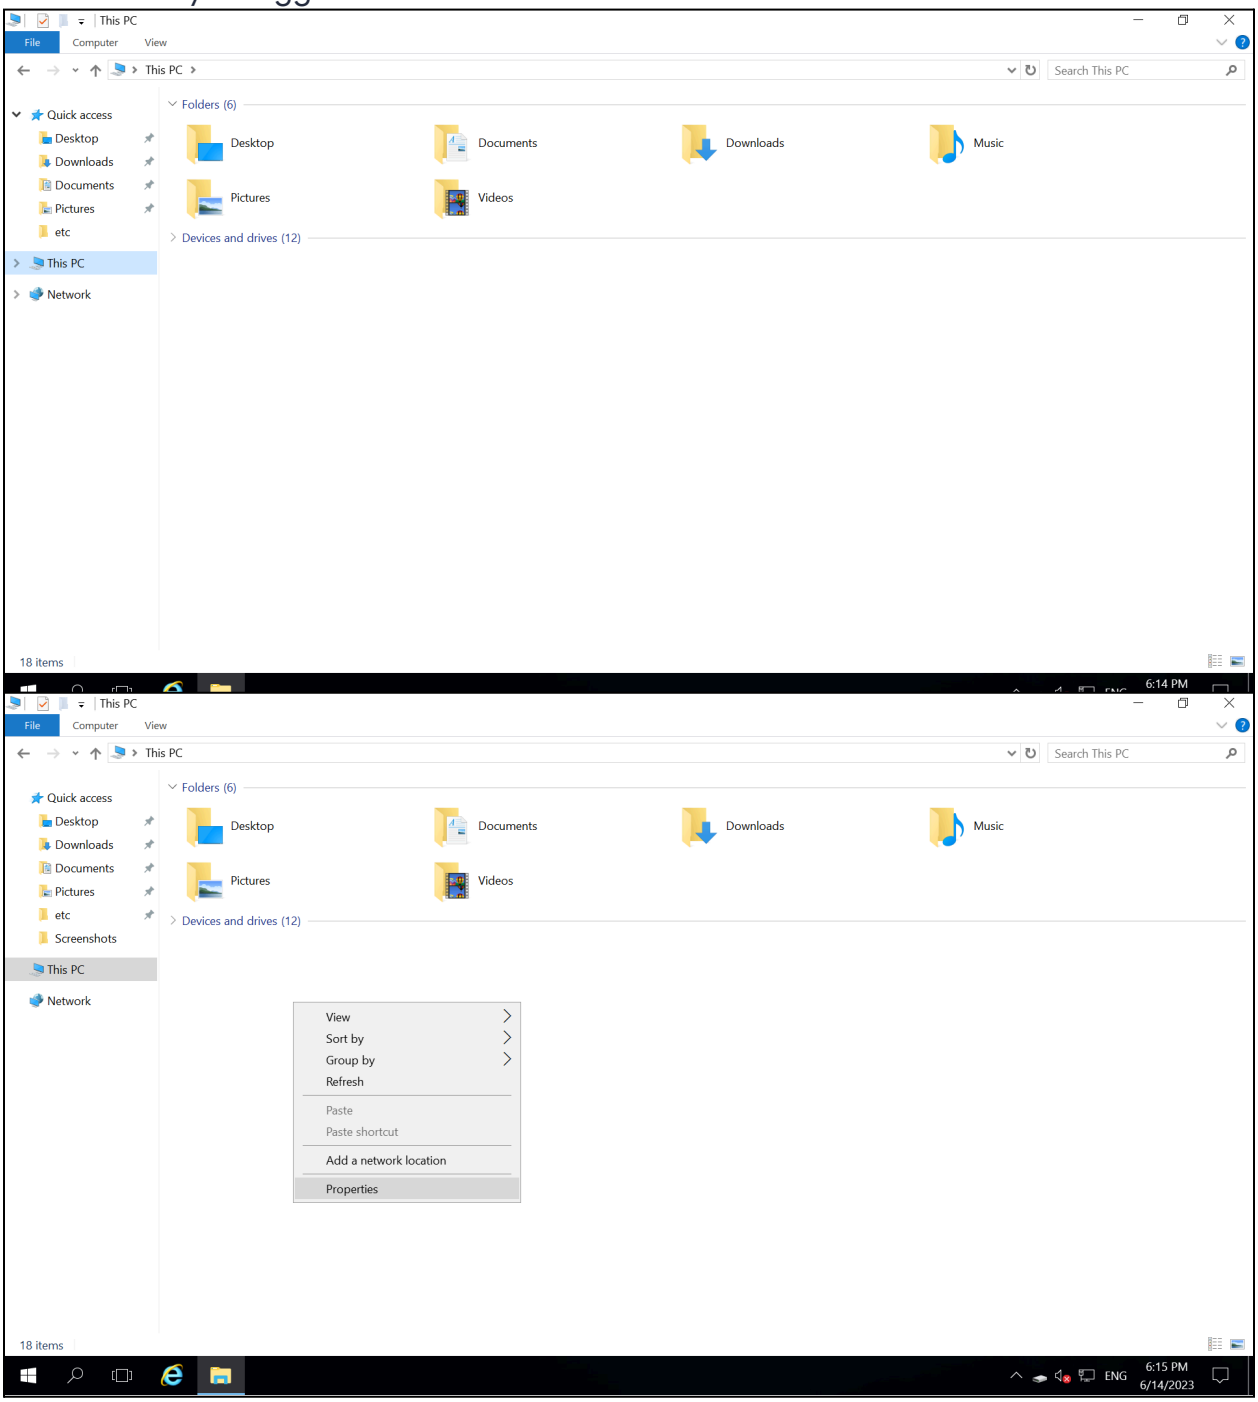
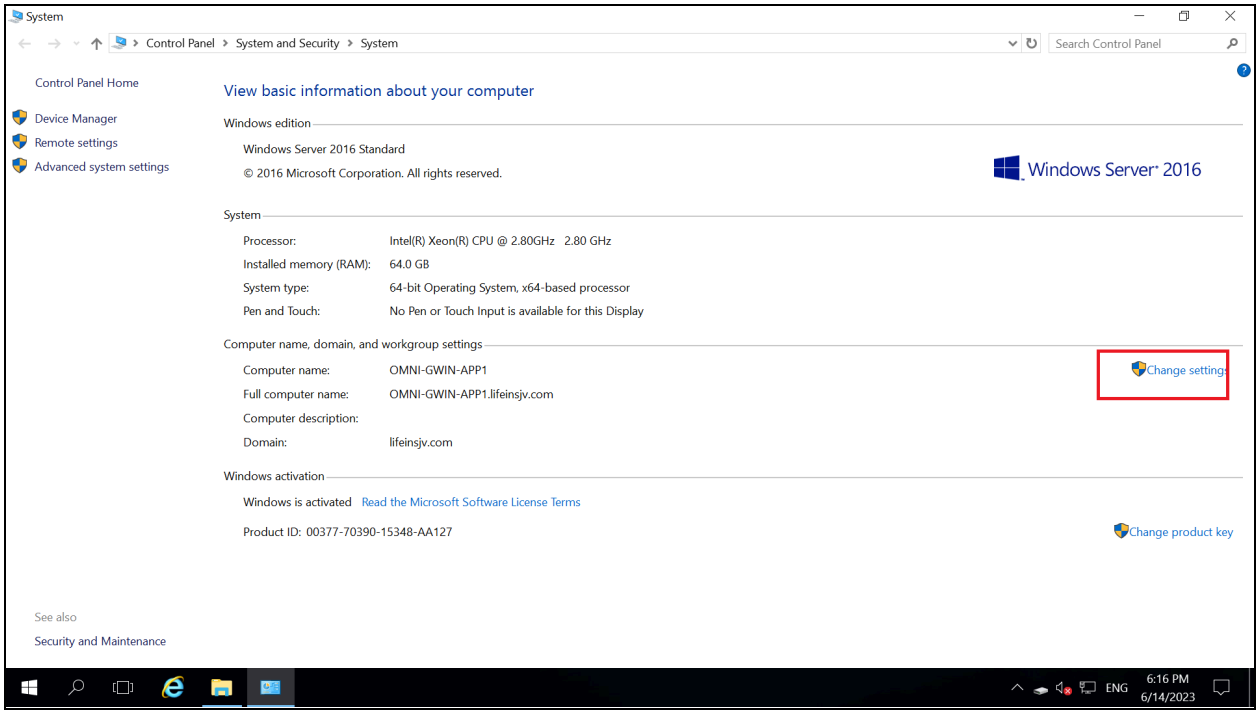
Prerequisite :

Make sure “LIFEINSJV.COM” domain is added into the VM

How to check it ?

1. RDP into server
2. Once you logged in into server Go to “**This PC**”





5. Now System properties window will be open. Select the “**Change**” option. New tab will be open named “System properties”.

   If you see the domain as “**LIFEINSJV.COM**” as shown the red box it means domain is already add into the VM .

   If you don’t see the domain then need to add the domain to VM .

   [Please refer document to add the domain to VM]
